Event Check-In

Authors: Evan, Morgan, Alina, China

Problem statement

The user is frustrated and needs a faster way to check into conferences with a larger audience. Our solution is aimed to provide the user with a seamless check-in for events.

Who is experiencing the problem?

Individuals wanting a quick and seamless way to check into events.

What is the Problem?

When individuals attend a large event it takes a great amount of time to check in due to the mass amounts of people entering at the same time.

Where does the problem present itself?

The problem presents itself at large gatherings where many people are attempting to check in at the same time leading to a chaotic situation.

Why does it matter?

People need a safe and fast way to check into events, especially during COVID-19 where people should not be grouped up waiting to enter an event.
